

Pittsburgh Tissue Engineering Initiative, Inc.

**2007 Summer Internship Program
Mentor Interest Form**

Would you like to have a Pittsburgh Tissue Engineering Initiative (PTEI) undergraduate intern work in your laboratory this summer? To help the Pittsburgh region attract and retain the best and brightest young people, PTEI sponsors the Summer Internship Program to showcase the many opportunities in biotechnology available throughout the region. Interns gain valuable research experience working in research labs, and they make professional and peer contacts that will serve them throughout their careers. Interns will be undergraduate college students pursuing careers in medicine, research, bioengineering, computer science, the natural sciences or related fields. They receive a stipend of \$3,800 for the 10-week internship that will run from May 29th through August 3rd, 2007. **PTEI will pay the full stipend for the intern** with mentors assuming responsibility for any expenses related to the intern's work within your laboratory.

Please complete the following to indicate your interest in mentoring a PTEI intern this summer. For more information about the internship program, contact LaShon Jackson, Program Coordinator, at ljackson@ptei.org or phone at 412/235-5230.

I am able to provide the following internship position.

Job description:

What is the relevance of your work to tissue engineering/regenerative medicine?

Experience levels of interns will vary; students may be freshmen or graduating seniors. To ensure that the internship is both a good educational experience for the intern and beneficial to the work of your laboratory, please be specific if you require certain qualifications.

Please return this form by February 16, 2007 to:
